Projects

GrowSkill.edu
Offline-first digital learning PWA for rural schools. Features: interactive student app, teacher dashboard, admin portal, AI reasoning model for progress, RAG model for doubt solving, IndexedDB for offline sync.

SkillSync
ERP-based integrated student management system. Built with React.js (frontend) and Node.js (backend), MongoDB, JWT authentication, RBAC, fee/hostel/exam modules, and AI chatbot with Gemini model.

REVCORP
Anonymous employee review reporting platform. Tech stack: HTML, CSS, JS, MongoDB Atlas. Enabled secure submissions with role-based access.

iCam
Object detection app for visually impaired. Integrated Python-based ML with TTS output to identify FMCG products and provide real-time audio feedback.
